- Openmod site/platform => OpenEnergy Platform  
(=> communication channel beyond community ?!)

# oep – OpenEnergy Platform

## About

We are a grass root initiative of modellers from various universities and research institutes across Europe.

## Aim

Open models and open data will advance knowledge and lead to better energy policies. Open up energy models improves quality, transparency, and credibility, leading to better research and policy advice.

[View manifesto »](#)

## Activities

The openmod initiative is a network, an interest group, and a platform. We exchange ideas and source code, lobby for policy support for open projects, and actively share data, code and knowhow.

[View Projects »](#)

## Connect!

- Come to our next workshop: **27-28 October 2016 at Politecnico di Milano**
- Join our [mailing list](#)
- Add/find open-data and open models on [the wiki](#)
- Write us an e-mail: [mail\[at\]openmod-initiative.org](mailto:mail[at]openmod-initiative.org)

# Extensions of the openmod platform - Fact Sheets

## Objectives of the FS:

- Characterization of
  - Scenarios
  - Models
  - Frameworks
- Comparability
- Transparency / Reproducibility

# Example to improve transparency– study „BBB“

For suggestions of improvement or helpful features please go to GitHub and create an issue:

<https://github.com/openego/oeplatform>

There is also an openmod GitHub possibly we will move the project there in future (not prio 1 because a lot of features are still waiting to be fixed):

<https://github.com/openmod-initiative>

For the break-out groups: If you want to start new features or activities or if you explore existing ones – please think about how to link it with our platform.
